

Your IVF Clinic, In Your Hand. Anywhere. Anytime.

The all-in-one mobile solution that liberates your clinic's data, putting the power of comprehensive IVF management right at your fingertips.

Track Every Process, Independent of Time and Place

Real-Time Sync

Live clinic data updated instantly across all devices.

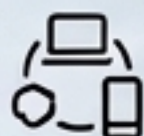

Cloud-Based Access

Monitor cycles and labs from anywhere in the world.

Full Integrated

Fully integrated with your existing desktop IVFID Witness System.

Complete Ecosystem

Fully integrated with your existing desktop IVFID Witness System.

A Single App, Tailored to Every Role

Role-Based Personnel Permissions

Clinic Owners

- ✓ Track performance, monitor success rates, and analyze yearly growth charts for data-driven decisions.

Doctors

- ✓ Review patient profiles, treatment cycles, medication schedules, and real-time outcomes between appointments.

Embryologists

- ✓ Monitor lab status, track oocyte/embryo development, and manage cryo storage occupancy instantly.

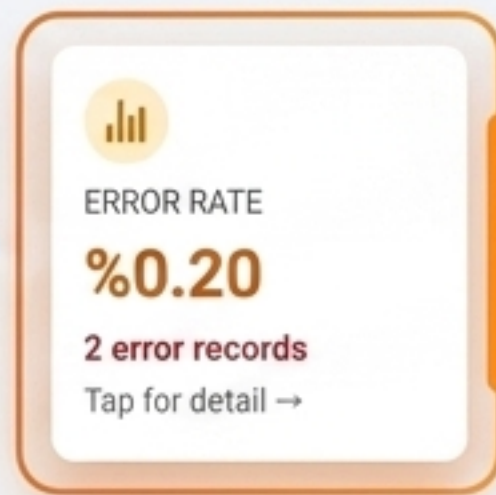

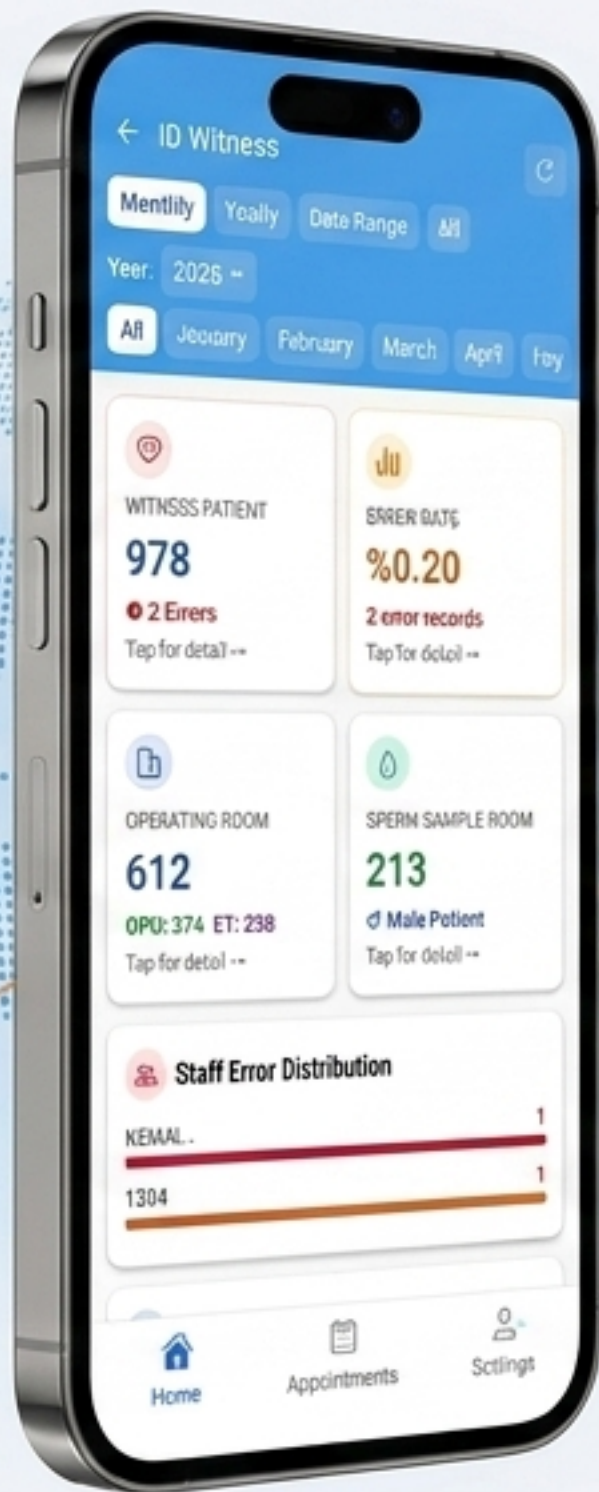

Administrative Coordinators

- ✓ Manage schedules, track real-time patient appointments, and oversee general clinic workflow effortlessly.

Customizable access levels ensure staff only see what their permissions allow—maximizing focus and data security. Customizable access levels ensure staff only see what their permissions allow—maximizing focus and data security.

Real-Time Overview for Immediate Insight

Instant Alerts: Monitor witness patients and track error rates in real-time (e.g., %0.20 Error Rate).

Live Status: Track active OPU and ET procedures instantly.

Staff Analytics: Measure performance and reduce errors with live distribution tracking.

Comprehensive Patient & Cycle Management

Medications & HCG

Track exact dosages, timings, and durations without flipping through charts.

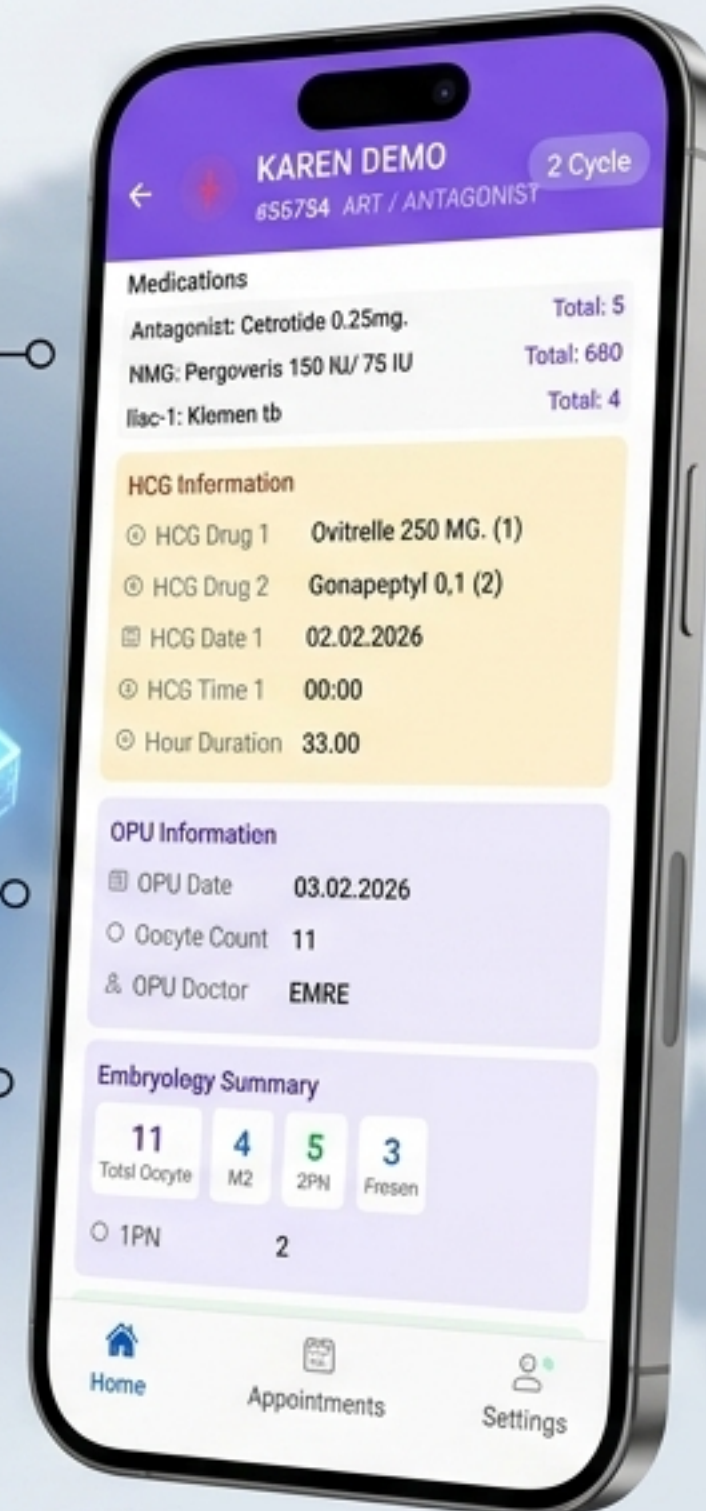

OPU & Embryology

Single-tap access to total oocytes, M2, 2PN, and frozen embryo summaries.

Genetic & Blood Type

Vital patient history consolidated into one unalterable digital record.

Digital Twin

Conceptual, high-tech layout

Smart Lab & Tank Control

Occupancy Tracking

Visual color-coded percentages for Tanks A, B, C, etc., showing exact embryo, oocyte, and sperm counts.

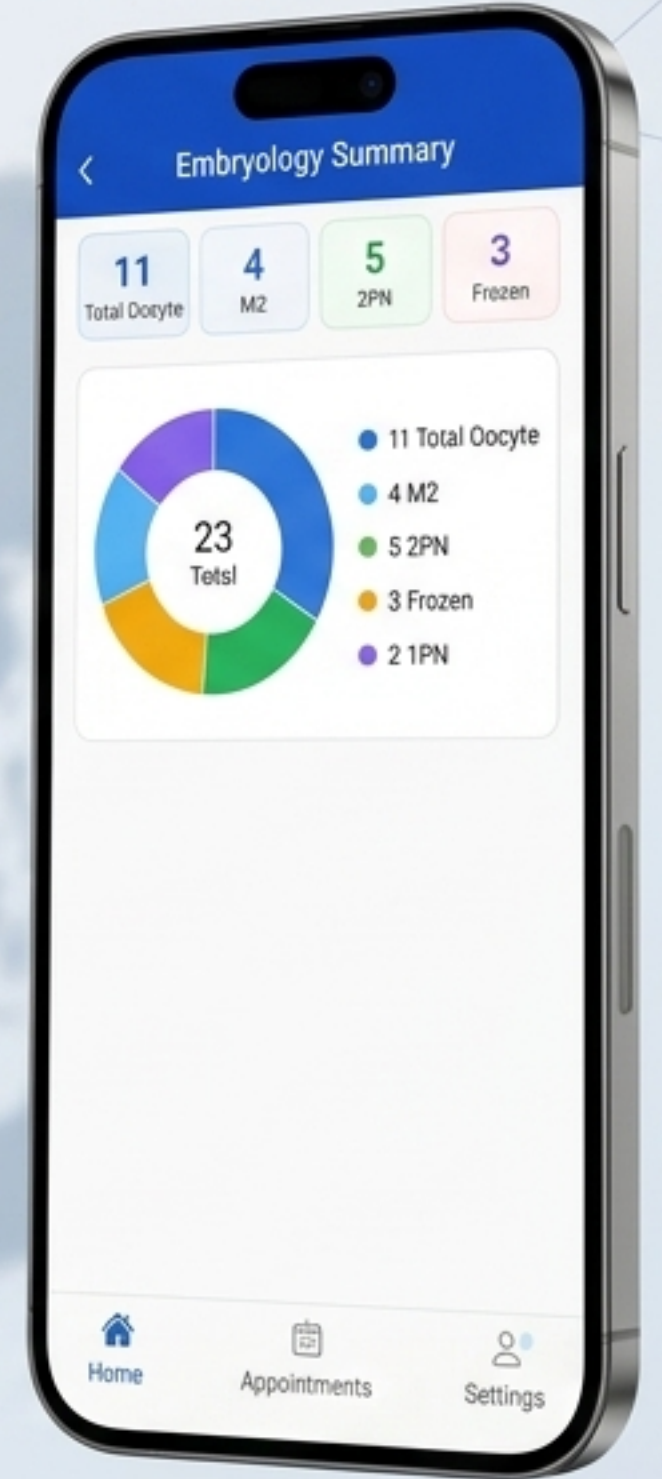

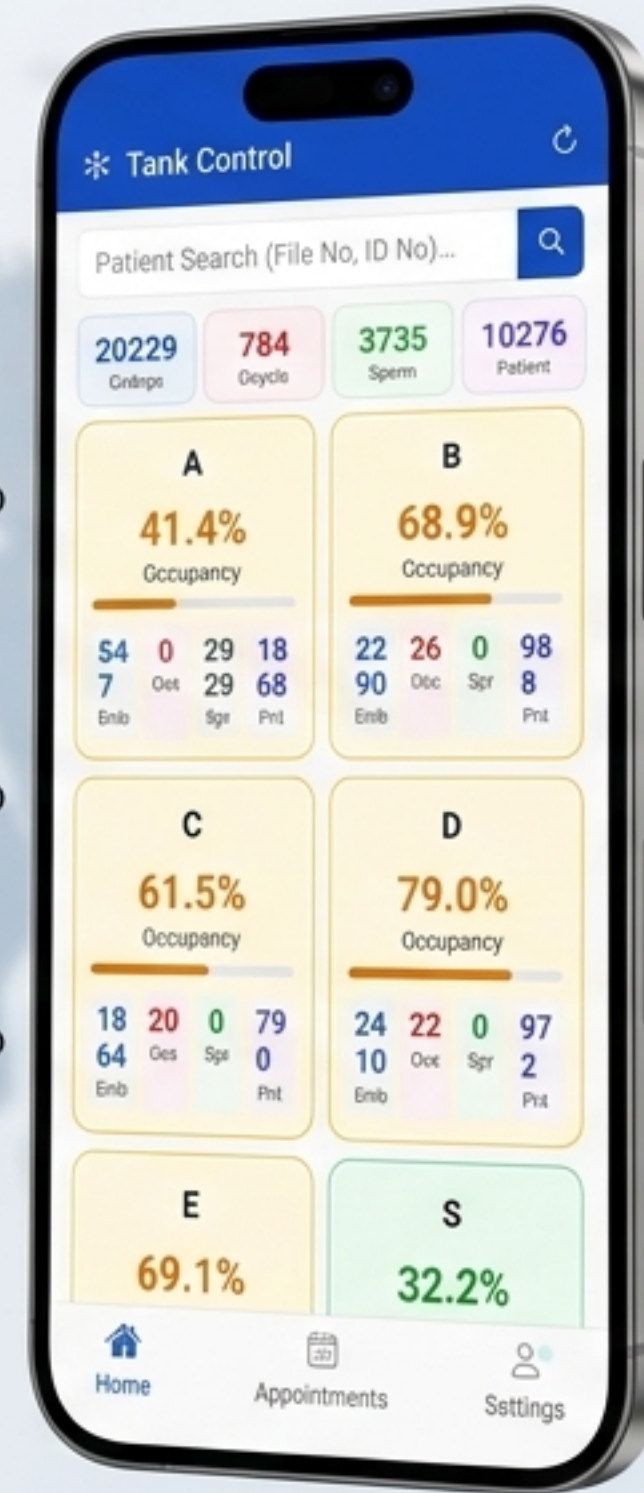

Resource Optimization

Real-time room and resource usage to prevent bottlenecks.

Absolute Confidence

Ensure the safety of cryopreserved assets from anywhere in the world.

Uncompromising Security & Safe Connections

Enterprise-Level Encryption

All data transmissions are highly encrypted, ensuring a secure connection regardless of network location.

Cloud-Based Compliance

Hosted on secure, reliable cloud infrastructure guaranteeing uptime and data safety.

Strict Role-Based Access

Granular permissions ensure users only interact with data authorized for their specific personnel level.

One Platform. Complete Control.

The IVFID Witness Mobile App seamlessly integrates with your entire infrastructure, bringing total control, intelligent analytics, and uncompromised security directly to your fingertips.

IVFID Witness System
